

## Questionnaire 2D Coverage Analysis

Company: \_\_\_\_\_

Contact name: \_\_\_\_\_

Address: \_\_\_\_\_

\_\_\_\_\_

Phone: \_\_\_\_\_

Email: \_\_\_\_\_

### What is your need?

- 2D analysis of HCP coverage using generic BioGenes' |360-HCP ELISA antibodies

E. coli|360 HCP ELISA:

CHO|360 HCP ELISA:

Type A

Type A

Type B

Type B

Type C

Type C

Type D

Type D

#### Method of detection:

Fluorescence-based

Colorimetric

- 2D analysis of HCP coverage using an external HCP ELISA antibody

Which: \_\_\_\_\_

Affinity purified

Total IgG

Shall the antibody be purchased by BioGenes:  Yes  No

#### Method of detection:

Fluorescence-based

Colorimetric

---

## Sample information

- **Sample derived from the following host:**

E. coli       CHO       Other, which: \_\_\_\_\_

- **Number of samples to be analysed:** \_\_\_\_\_

- **Sample constitutes:**

Cellular lysate       Cell culture supernatant       Purified protein solution

Estimated protein concentration and method of determination:

\_\_\_\_\_

Buffer composition: \_\_\_\_\_

- **Sample represents:**

Mock fermentation

Process sample with drug substance:

If yes: What kind of **drug substance** do you have (rec. protein, humanized antibody, ...)?

\_\_\_\_\_

If yes: Can you provide an **anti-drug substance** antibody?     Yes     No

From (species): \_\_\_\_\_
